UNDERSTANDING THE ROLE OF PHYSICIAN INTEGRATION WITHIN NURSING HOMES IN POST-ACUTE CARE OUTCOMES

RESOURCE SHARING STATEMENT

This application requests support to collect research identifiable data for 350,000 Medicare beneficiaries admitted to nursing home for post-acute care. To protect confidentiality of these individuals we will not be able to share those data as per CMS regulations. However, full analytical codes (written using STATA software, College Station, TX) used to process the data will be made available to other researchers through the data sharing website of the University of Pennsylvania.

Question not answered.
