

## Plan Overview

---

*A Data Management Plan created using DMPTool-Stage*

**Title:** Example 2

**Creator:** Hammad Khan

**Affiliation:** The University of Texas at Arlington (uta.edu)

**Principal Investigator:** Hammad Khan

**Data Manager:** Hammad Khan

**Funder:** National Science Foundation (nsf.gov)

**Funding opportunity number:** 45852

**Template:** NSF-GEN: Generic

**Last modified:** 03-17-2021

**Copyright information:**

The above plan creator(s) have agreed that others may use as much of the text of this plan as they would like in their own plans, and customize it as necessary. You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal

---

## Example 2

The data we will be collecting is numerical qualitative and numerical quantitative. The first stage of the project will use numerical qualitative data, this data will describe the diversity of issues warehouses faced when using different pallet's design. The second stage of the project will use numerical quantitative data to describe the economic impact pallet design have in the operating cost of the supply chain.

Question not answered.

I agree to deposit genetic outcome data into {} repository as soon as possible but no later than within one year of the completion of the funded project period for the parent award or upon acceptance of the data for publication, or public disclosure of a submitted patent application, whichever is earlier.

Question not answered.

Data will be archived using the eCommons@Cornell service. Spectral data and metadata in tabular form will be stored as \*.csv

format. Record images collected of the study site or instruments will generally be saved in \*.jpg format, while microscope data, or

other data from which measurements may be required, will be saved in \*.jp2 (lossless) or \*.tiff forma
