Project abstract:

Considering the reduction on basic interest rate in Brazil, the bonus payments obtained through “caderneta de poupança” (a popular and traditional brazilian special type of account which total value is correct by inflation index and standard low taxes, basically), which is the most used investment in the country, have been becoming deficitary. This fact has led to a growth in the number of individuals investing in the stock market looking for more attractive profitability. The system objective is make available an agnostic system that analyzes in real time the investment funds that have shown the best performance and can suggest, for people with low level of financial knowledge, the funds portfolio that best suits the investor profile. In order to build the system, open fund databases made available by CVM in Brazil (dados.gov.br) and the investor's potential profile are explored, using the most appropriate user friendly computational tool. Besides, a system cliente survey deployed have its answers compiled and analysed in a paper tied to system implementation.

ONLINE AGNOSTIC RECOMMENDATION SYSTEM FOR APPLICATION IN INVESTMENT FUNDS

Three Datasets are actually uses:

(1) CVM Dataset with Funds information

- this dataset is a kind of catalog of each fund, and from it it is possible to correlate with the data dataset that follows, using CNPJ information (type character). Available information:
Fund CNPJ (character -Objective of correlation),
Corporate name (character),
Manager (character),
Registration date (character),
Date of cancellation (character),
Status (character),
Fund classification (character),
Type of profitability (character),
Fund managing institution (character),
CNPJ of the Institution (character),
Responsible director (character).

(2) CVM Dataset with Daily Funds information

- it has daily information distributed in fields and types on:
the Fund's CNPJ (character format),
the total value of the fund's portfolio (float format),
Equity (float format), the value of the quota (float format),
The funding carried out on the day (float format),
The redemptions paid on the day (float format),
The number of shareholders (int format).

(3) User Information Profile

* Notice - respecting to Brazilian Law 13.709/18

- Name - indicated by user
e-mail - to receive information on optimal investment funds to his/her profile
Eight answers to questions tha categorizes:
0 - investor thay would'nt like to take risks on investments,
5 - categorizations for mid-term investors considering take risks
10 - investor able to take risks as stock options to achieve better profitability

- Dataset (1) and (2) are extracted by files available in dados.gov.br (cvm - brazilian funds)
- Dataset (3) - based are collected by a Google Form proposed to use evaluation and so stored in a Google Sheets.

Documentation is available on Github together Code and Data

There is no ethical issue to be treated, once system respect to Brazilian Data Law number no. 13.709/18

It is an open research. Results were collected for a paper evaluation, but that is no PR/IPR issues.

System information to replicate and evolve it, it is available on Github. For more information check

Internal tables depend only on date/time system is running in python stored in GCS (Google Cloud System) as a PaaS

Admin account rights @ GCS environment

All necessary data to recover and run the system is available in Github.

There is no retention on data treated in mentioned datasets

GCS PaaS exposed, currently, on IP 34.95.230.228

Preservation will be done considering information @ Github.

Also system description and its usage in scientific article.

No other long-term preservation intended.

Data is shared in Github. Research will be also put available in Research Gate, for research proposals

Not at all

Mentioned Principal investigator and eventually Project Manager (in fact - engineering advisor professor) are responsible for data (and system) preservation and its evolution

Plan execution depend on:

> Google account resource

> Google Sites tied to this account

> Google forms tied to this account

> GCS also tied to account created
