Plan Overview

A Data Management Plan created using DMP Tool

DMP ID: https://doi.org/10.48321/D13031

Title: ISP Plastic Cleanup

Creator: Emma Klessig - **ORCID:** 0000-0003-1463-2554

Affiliation: University of California, Berkeley (UCB) (berkeley.edu)

Principal Investigator: Emma Klessig, CeeCee Chen, Sabina Lee, Lana R. Kuo, Kathryn McNeal, Kanani Bowie

Funder: National Science Foundation (nsf.gov)

Template: Tetiaroa Field Station

Project abstract:

Our class of twenty one students were sent to two different motu within Tetiaroa. Two groups were on Tiaraunu starting on the north and south interior ends working toward one another. The two groups did not reach one another due to time constraints. The third group collected on Reiono and completed the whole motu. The collection method was standardized with a meter stick. Starting on the high tide mark we had each person stand two meters apart working inland. Then we would walk between waypoints that previously given to us on GAIA. Once we reached a waypoint we complied our trash and documented it with a picture. We used a meter stick and our class notebooks to help refer to the size of the trash.

ISP Plastic Cleanup

Methodology

How will data be collected or produced?

Data was generated in the form of photos with meter sticks and our field notebooks as standardization.

Access, Data Sharing and Reuse

Will you require an embargo period prior to making your prepublication data available? If requested, an embargo period may be granted for up to [1 year] after the end date of the Project as specified in its Data Management Plan.

- No

N/A

Do you agree to share all prepublication data contributed to the Tetiaroa Data Trust under the CC-0 license?

- Yes

N/A

Will your project include the collection of material samples? For example, archeological, geochemical (geosamples), and biological (biosamples) materials.

- Yes

N/A

Please describe standards you will utilize to register sampling events, apply unique identifiers, implement relevant metadata standards, and track derived material samples, data, and outputs.

we used a meter stick and our field notebooks which each individual doing the sampling has

What are the further intended and/or foreseeable research uses for the completed dataset(s)?

N/A

State any expected difficulties in data sharing, along with causes and possible measures to overcome these difficulties.

N/A

Documentation and Metadata

What documentation and metadata will accompany the data?

N/A

Ethics and Intellectual Property

How will you manage copyright and Intellectual Property Rights (IP/IPR) issues? Demonstrate that you have sought advice on and addressed all copyright and rights management issues that apply to the resource.

N/A

How will you handle sensitive data. Make explicit mention of consent, confidentiality, anonymization and other ethical considerations, where appropriate.

N/A

Are any restrictions on data sharing required – for example to safeguard research participants or to gain appropriate intellectual property protection?

- No

N/A

Short-Term Storage, Security, and Data Management

Describe the planned quality assurance and back-up procedures, including security/storage and any use of encryption.

N/A

How will you manage access and security?

N/A

Specify the responsibilities for data management and curation within research teams participating in your project at all participating institutions.

N/A

Selection and Preservation

Which data are of long-term value and should be retained, shared, and/or preserved?

N/A

What is the long-term preservation plan for the dataset?

N/A
